Address: **Cleburne**
Price: **Free**

I trapped a feral cat and her 4 kittens. The mother was taken to TCAP then released. 2 of her kittens have been adopted so we still need to find a home for the remaining 2. The orange tabby is a male. The female is mostly a dark gray with patches of white and orange. The have done very well getting use to human contact. They are approximately 10 weeks old. They have received one round of de-wormer. The kittens are free but if you would like to make a donation of any amount toward the care of feral cats and kittens it would be greatly appreciated. These two kittens are living in a pet playpen in my shed. They have an electric blanket and a electric heater for warmth but it is still pretty chilly in the shed. I have had the kittens about 2 weeks now and I'm sure they are growing tired of the playpen. They really do need a good home as soon as possible. I would like to keep them together if possible.
